## OBJECTIVE:

After my 10<sup>th</sup> class I had decided to precede my career with Computer technology and persuaded with Diploma in computer technology. After successful completion I had moved forward with bachelors of engineering in the same field. Currently I am fully focused in today's latest tools and technologies and ready to utilize my all leanings.

## Education:

- Diploma holder (Computer technology)83% and Graduated in B.E (Bachelors of Engineering incomputer tech)8.44 cgpa.

---

## EXPERIENCE : 2 month internship at devomark

---

Company : **DEVOMARK**

Role: UI Developer

In Devomark, I got opportunity to work with development team .Here I had hands-on experiance in HTML,CSS amd javaScript and with these skill set I managed to develop front end of website. I also came to know about work culture and latest tools and technologies that are currently indemand in market.

### 1. HTML/CSS:

- Develop and maintain clean, semantic, and cross-browser compatible HTML/CSS code.
- Implement responsive designs to ensure optimal user experience across different devices and screen sizes.
- Collaborate with UI/UX designers to translate design mockups into functional web pages.
- Optimize and enhance website performance by optimizing CSS code, image compression, and caching techniques.
- Stay updated with the latest HTML/CSS trends and best practices.

### 2. JavaScript:

- Write efficient and reusable JavaScript code to add interactivity and dynamic functionality to web pages.
- Debug and troubleshoot JavaScript issues to ensure smooth functioning of web applications.
- Optimize JavaScript code for improved performance and loading speed.

### 3. Python :

- Proficient in Python programming language, with a strong understanding of its core principles and best practices.
- Familiarity with front-end technologies like HTML, CSS, and JavaScript.
- Ability to collaborate effectively in a team environment and communicate technical concepts clearly.

#### 4. PHP :

- Proficient in PHP programming language, with a strong understanding of its syntax, object-oriented principles, and best practices.
- Solid knowledge of front-end technologies including HTML, CSS, JavaScript.
- Familiarity with database management systems, like MySQL.
- Ability to collaborate effectively in a team environment and communicate technical concepts clearly.

#### 5. SQL :

- Proficient in SQL programming language, with a deep understanding of database concepts, data modeling, and query optimization.
- Experience in designing and implementing complex relational database schemas.
- Strong problem-solving and analytical skills to troubleshoot and resolve database issues.
- Ability to collaborate effectively in a team environment and communicate technical concepts clearly.

### **PROJECT:**

#### **1.HOTEL MANAGEMENT SYSTEM**

It is a software website which help people to book hotels.

#### **2. AIRLINE MANAGEMENT SYSTEM**

It is a software website that helps people book flights.
