TECHICAL KNOWLEDGE

- **Programming Language**: C, C++, JAVA, HTML.

- **Databases:** MYSQL

- **Software Known:** Word Press

- **B.Sc SEM-5 Project**

PROJECT UNDERTAKEN

TITLE: **Visitor Management System** (Dummy).

Description: The System will be developed using C#, SQL Server Database. Visitor Management System can manage all incoming and outgoing People/Vehicles from your office or company. Its main aim is to secure company from outside visitors, contractors and the security of department's company vehicle. This system will be used to allow a person, as authorized to access (by vehicle) to guests. Which means for every entry there is someone responsible for.

In this, the records of visitors can be added and maintained by the system directly. The proposed system will be maintained in computerized manner, where the data will be stored in the database. The System will be used by the Guards and can be monitored. Vehicle details will be entered only for the person entering the premises with a vehicle by the guard. Purpose will also be maintained i.e. to whom the visitors are visiting.

- **B.Sc SEM-6 Project**

PROJECT UNDERTAKEN

TITLE: **Online Bus Pass System** (Dummy).

Description: The System will be developed using C#, SQL Server Database.

The Online Bus Pass System is a Web based application that will help the user to get their Bus Pass online. In the system, the user will register their details through online. After the registration, user can create their Pass.

For renewing the Bus Pass there is no need to wait in the long queue for renewing. The candidate can Login and can renew their Bus Pass. The proposed system overcomes the drawbacks in the existing system. In the proposed system user register their details through online and get their unique username and password for further processing.
